

Edouard

I am a Blogger

Hi I'm a senior web developer, comfortable with php(4.x ~ 5.5), Symfony(2.0 ~ 2.6), design patterns, NodeJS, AngularJS(1.2 ~ 1.3.8), Apache, Nginx, Redis, ElasticSearch, Javascript, Html5, Java for android, Linux based system administration and high scalability issues. For data persistence, I work with Mysql, MongoDB and Redis. I am also a blogger.

MY RESUME (9 YEARS OF PROFESSIONAL EXPERIENCE)

My resume does not include hours of work on personal projects and technology Watch.

WORK EXPERIENCE

HEADOO (HEADOO.COM) - LEAD DEVELOPER (Full Stack)

2014 - 2015 (I'm still in office)

Backend Side

- . Symfony 2.0 to 2.5 company website migration
- . Good practices methods used for user roles and ACL
- . API management system with FOSRestBundle
- . Use of Doctrine extensions and behaviors
- . Payment system with the excellent PayumBundle
- . Choice of LiipImagineBundle for fileSystem management
- . Dropbox, Facebook, Twitter sdk
- . Codeception for unit, functional and acceptance tests
- . Elasticsearch to improve search performance for statistics inside backoffice
- . Internationalization system, including database with Doctrine behaviors
- . Bug fixes
- . Some php scripts hosted on my Github
- . New development logics with design pattern implementation

Server Side (Linux Ubuntu distribution)

- . Dropbox, FFMPEG, Nginx, Elasticsearch, MEMCACHE installation
- . Linux user account management
- . Cluster management with database replication
- . Elasticsearch monitoring
- . Load balancing with LVS
- . Mail system with ISPConfig
- . Forever implementation, for running NodeJS applications in background
- . etc...

Front Side

- . Development of "Monalisa", an Html5 video application for the first "videoMaton" in France
- . Monalisa runs only over NodeJS with expressJS server
- . Two versions of Monalisa (vanillaJS and AngularJS)
- . Internationalization with AngularJS, plus angularJS SEO issues . Usage of NodeJS with NPM and Bower for front dependencies
- . Many little javascript scripts, hosted on my Github

MY SKILLS

Github / composer (exclusively in cli mode)

Linux Server administration (Debian distribution)

Windows softwares (xp => 8), including Powershell

Php

Javascript (vanilla)

JQuery

Java for android

HTML5 / CSS3

Symfony 2.x

AngularJS 1.3.x

NodeJS ecosystem

Apache / Nginx

ElasticSearch

RabbitMQ

Low level softwares

- . Powershell script to send pictures directly from a computer to an iPad through FTP inside a local WiFi network . Windows (XP to 2008) software development for the Monalisa application. (Install our application on all Videomaton machines effortlessly)
- . Mac OSX and Linux softwares in progress

Mobile side

- . Android mobile application development. Take a picture from your mobile with our application, and get it on our digital platform

Scalability management

- . Nginx to handle HTTP requests asynchronously
- . Nginx micro-caching and reverse proxy
- . MemCache to speed up data access
- . LVS to redistribute server load between the servers
- . Lazy loading of scripts, CSS files and pictures
- . Cron system to handle huge database operations on specific time
- . Very high performance servers
- . Elasticsearch for heavy search operations

Management and methodology

- . I always work with agile method
- . I manage a junior developer, and am an advisor for another developer (only back)

Travel

- . Travel throughout France to help customers succeed operations

Redis / MongoDB

RDMS (Mysql, PostgreSQL)

WHAT THEY SAY

Ana Luiza Cicconi

Web Developer (Headoo)

Edouard is a great and multitask developer. This kind of person who knows a little bit about everything and who is always there to help when anyone has a doubt. It is a pleasure to work with him at Headoo.

DATAGEST - LEAD DEVELOPER

2012 - 2013

Backend Side

- . Rewriting of company home framework with Symfony 2.2
- . Implementation of unit testing practice with Codeception
- . Strong implementation of design patterns to handle code scalability
- . Simple PHP API development that communicates with Microsoft Navision ERP
- . Light e-commerce platform development with Symfony 2.2
- . Implementation of JMSPaymentBundle to deal with payment gateways
- . Light home CMS development to easily deploy the same e-commerce website for multiple customers

Front Side

- . Cookies management
- . Some little and helpful scripts using XMLHttpRequest

Server Side

- . A management of three servers cluster
- . Mail server management with ISPConfig
- . Git, Composer installation. A VCS is mandatory for team work.
- . RabbitMQ installation to communicate between the servers through AMQ protocol

Scalability management

- . Data caching with MemCache
- . Varnish as reverse proxy
- . Mysql Cache
- . Cron system to handle huge database operations on specific time
- . High performance servers

Management and methodology

- . Three developers management (two juniors, one confirmed)
- . Always with agile method
- . Permanent contact with sales team and customers

ND INTERACTIVE (EVERFEEL.NET) - LEAD (WEB) DEVELOPER

2011 - 2012

Backend Side

- . Website developement from A to Z with Symfony 2.0.1
- . User and groups management system with FOSUserBundle
- . User role management with ACL system
- . Private messaging system
- . Internationalization (French, english)
- . Cache management system with APC
- . Facebook API implementation

Front Side

- . NodeJS with socket.io to deal with a real time application
- . Home based chat system
- . Cookies management
- . Multiple native JS and jQuery scripts development

Server Side

- . Learning the basics with the system administrator

Scalability management

- . Very high performance servers
- . Varnish as reverse proxy
- . MemCache for datas
- . Mysql Cache

Management and methodology

- . Co-working with an integrator and an ux designer
- . Always with agile method

WEBPOPULATION (WEBPOPULATION.COM) - WEB DEVELOPER

2011

Backend Side

- . Training on webpopulation framework, inspired from ZendFramework
- . Integration of Facebook and youtube api
- . Paypal, CreditAgricole, Ogone payment gateways implementation
- . From scratch user role management system
- . Search with mysql caching and smart pagination
- . Internationalization (French, english)
- . Facebook API implementation

Front Side

- . Multiple native JS and jQuery scripts development

Management and methodology

- . Co-working with a pole of ten developers and integrators
- . Always with agile method

DEEDOOZ- CEO & WEB DEVELOPER

2009 - 2011

Backend Side

- . Website from scratch with no framework, nor CMS

- . Always with agile method
- . One associate, one press officer, and one employee

Travel

- . Travel throughout France to find funds and create business opportunities

ELSEVIER MASSON (ELSEVIER-MASSON.FR)- WEB DEVELOPER (FLASH AS3) / WEB DESIGNER

2007 - 2009

Backend Side

- . Flash animation development in AS3 for rich media banners (Action Script 3)
- . Interactive media presentation for books, in AS3
- . Little basic php scripts
- . Bug fixes

Front Side

- . Template design with Photoshop
- . Html an CSS template integration
- . Multibrowser testing

Management and methodology

- . Always with agile method

Training

- . Several hours of personal training about php development
